

Kia Ora, my name is Fern. Today I'm talking about my most favorite game. It has 24 million daily players, and over 230 million monthly players . You can emote, buy cool skins, and play online with friends and family. Can anybody guess which game I'm talking about? Yes it's Fortnite

Fortnite is in the top 10 downloaded games. It's free to download so you don't need to spend any money- you just need wifi and a device to play on. Whether it be an xbox, playstation, phone, or computer, you can play fortnite! It's also a good way to hang out with family/friends - you can talk to each other and get a victory royale (a win) at the same time.

On the weekends, I play fortnite with my cousins when we can't meet up in person. Although we live so far away, Fortnite brings us together where we can show off our latest skins to each other while we're in the lobby. We also do emotes (a short set of dance moves that your character performs) before our game starts.

I love playing Fortnite and getting to pick my favorite skins. I buy the battle pass to

**earn heaps of skins, back bling,
harvesting tools and more. You get to
keep them forever and you can gift skins
from the item shop to your friends/family.**

**Thank you for listening to me and for
being a great audience, so I hope you
check out fortnite!**
