

In LS1, this term was full of exciting things like playing fun games, doing a speech in front of the classroom, kapa haka and art. Thinking back on the last few months, I'm so happy about doing it together with a friend. I've been busy with all sorts of subjects, but the best part about Term 3 for me

was writing.

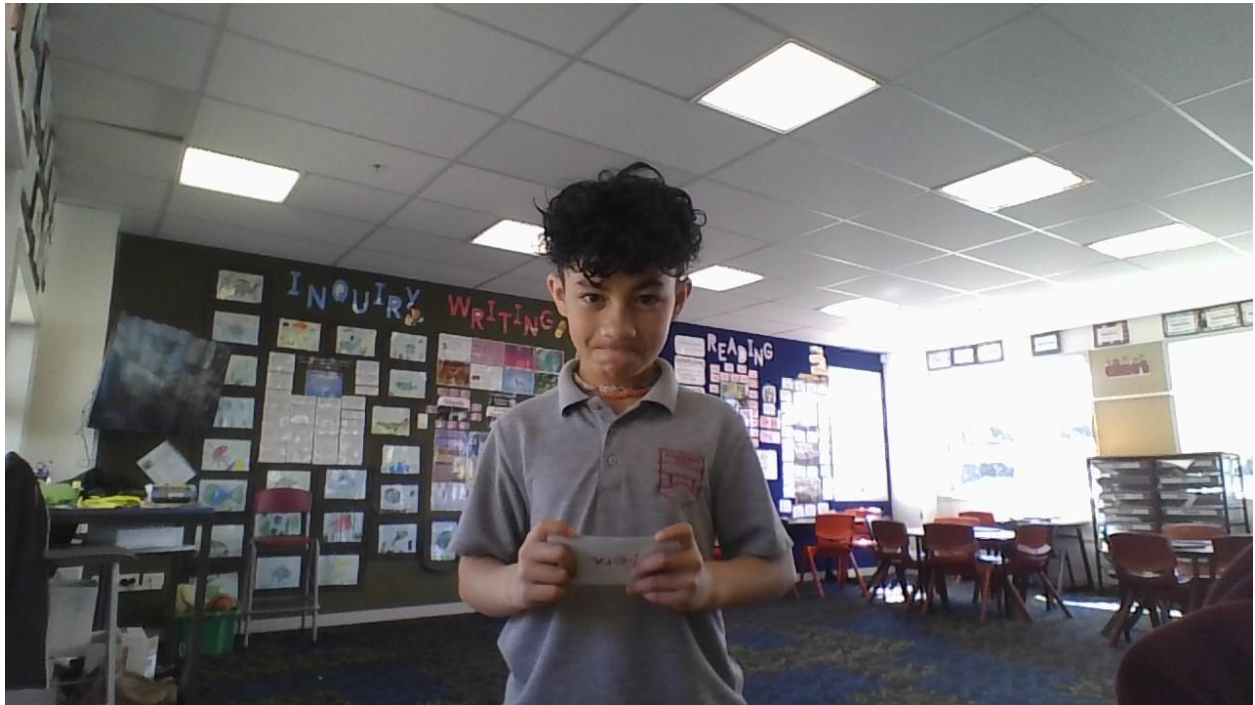

When it comes to reading, my favourite text I read was how does water get into the tap. I most enjoyed reading how the water goes down the

mountain in reading.

Writing was super fun, especially when I got to do my speech in front of the whole class. My favourite task in writing this term was persuasive speech because I loved performing in front of people and I loved to make them

laugh.

In Maths, I especially enjoyed when we learnt about pencil code because it could make shapes and make different angles on pencil code.

For our special Inquiry experiments, I really enjoyed dancing raisins because when we poured the raisins in the sprite it made it bounce up and

down which makes it look like its dancing

In P.E. (Physical Education), I had a blast participating in soccer because I was a boy who got chosen for soccer.

I learnt how to be a good sportsman, communication skills and

leadership.

But you know what? I also found some areas where I can get even better. Like in reading.
